A Note to Teachers

When we first approached teachers about our idea for the **+1 MATH APP**, we got some pushback. Some worried that this program would be used to devalue teachers, and that administrators would use it as an excuse to replace experienced teachers with inexperienced ones. They fear the day is coming when the school boards will declare, *"Why are teachers important now that everything can be learned online?"*

We completely disagree with the mindset that online teaching can replace in-person teaching.

We are teachers ourselves, and we know that merely delivering information is a small aspect of being a great teacher. It's the connection between teacher and student: the inspiration that we as teachers bring that makes the difference. The idea that one can successfully replace teachers with computer programs is unfounded.

+1 MATH is designed to help teachers, not replace them. *It's not a teaching tool:* we have no lessons or videos about how to do algebra or geometry. The program was designed to give students the practice and feedback they need to approach their standardized tests and Common Core exams with confidence.

We believe **+1 MATH** will help *you* as well. Teachers can design worksheets or quizzes for students quickly and easily. With a few clicks, **+1 MATH** can give a specific student every question he or she has struggled with in the past. You can design a 20-question, multi-topic quiz for one student or multiple students in under 30 seconds. And the test will grade and analyze each test for you.

We think this will be a great help for teachers, and we look forward to hearing your feedback!

Sincerely,

A handwritten signature in blue ink that reads "Elie Venezky".
